people

int	id	PK	
string	full_name		
string	email	UK	
string	department		
string	job_title		
enum	status		active, departed
datetime	departed_at		nullable, set exactly when departed
datetime	created_at		
datetime	updated_at		

users

int	id	PK	
int	person_id	FK,UK	nullable
string	username	UK	
string	password_hash		Werkzeug hash, never the password
enum	role		admin, viewer
datetime	last_login_at		nullable
int	failed_logins		
datetime	locked_until		nullable

systems

int	id	PK	
string	name	UK	
enum	category		erp, cloud, saas, ci_cd, messaging, ai_agent_platform, network, database, other
enum	criticality		low, medium, high
text	description		

nhis

int	id	PK	
string	name		unique within its system
enum	type		service_account, api_key, oauth_grant, webhook, deploy_key, certificate, ci_token, ai_agent
int	system_id	FK	
int	owner_id	FK	nullable, null means no owner recorded
text	purpose		
enum	environment		prod, staging, dev
enum	privilege_level		read, write, admin
enum	storage_location		vault, config_file, env_var, source_code, chat_or_ticket, unknown
enum	status		active, rotated, transferred, revoked, decommissioned
datetime	created_at		seedable identity creation date
datetime	last_used_at		nullable
datetime	last_rotated_at		nullable
datetime	expires_at		nullable
json	attributes		keys fixed per type by ATTRIBUTE_SCHEMA
string	fingerprint		nullable, sha256 hex of the secret literal
int	registered_by	FK	nullable
datetime	registered_at		
datetime	updated_at		
int	current_score		nullable, copy of the latest assessment
enum	current_band		nullable, low, medium, high, critical

scopes

int	id	PK	
int	system_id	FK	unique with name
string	name		
enum	sensitivity		low, medium, high

offboarding_cases

int	id	PK	
int	person_id	FK	the leaver; unique while the case is not closed
enum	status		open, in_progress, closed
int	opened_by	FK	
datetime	opened_at		
int	closed_by	FK	nullable
datetime	closed_at		nullable
text	notes		reserved, never written in v1

scan_runs

int	id	PK	
text	target_path		
int	started_by	FK	
datetime	started_at		
datetime	finished_at		nullable
int	files_scanned		
int	findings_count		
int	true_positives		nullable, against ground truth
int	false_positives		nullable, against ground truth
int	missed		nullable, against ground truth
float	recall		nullable, against ground truth
float	precision		nullable, against ground truth

audit_events

int	id	PK	
int	actor_user_id	FK	nullable, null for system and seed
string	action		
string	entity_type		indexed with entity_id
int	entity_id		nullable, null when the event concerns no stored row
json	before		nullable
json	after		nullable
string	ip		nullable
text	user_agent		nullable
datetime	created_at		indexed

import_batches

int	id	PK	
string	filename		
int	uploaded_by	FK	
datetime	uploaded_at		
int	rows_total		
int	rows_created		
int	rows_updated		
int	rows_rejected		
json	error_report		nullable

offboarding_items

int	id	PK	
int	case_id	FK	ON DELETE CASCADE, unique with nhi_id
int	nhi_id	FK	
enum	decision		pending, rotate, transfer, revoke, keep
int	new_owner_id	FK	nullable, required for transfer
text	justification		nullable, required for keep
int	decided_by	FK	nullable
datetime	decided_at		nullable

findings

int	id	PK	
int	scan_run_id	FK	
int	nhi_id	FK	nullable, linked during triage or by fingerprint
text	file_path		
int	line_no		
string	secret_type		
string	masked_preview		
string	fingerprint		sha256 hex of the literal
float	entropy		nullable
enum	status		new, confirmed, false_positive, linked
datetime	detected_at		

nhi_scopes

int	nhi_id	PK,FK
int	scope_id	PK,FK
datetime	granted_at	

risk_assessments

int	id	PK	
int	nhi_id	FK	ON DELETE CASCADE
int	score		0 to 100
enum	band		low, medium, high, critical
json	factors		per factor sub-score, weight, contribution
json	flags		rule codes of spec 5.3
string	policy_version		
datetime	computed_at		indexed with nhi_id, descending
enum	trigger		seed, write, manual, offboarding
